

Client / Contractor:

Port River Gas Main Epic Energy

Job category: Maintenance

Scope of work:

Basetec Services were asked to specify and refurbish a Mild Steel High Pressure Gas Main, which was corroding badly at the concrete haunching area. The integrity of the pipeline needed to be refurbished to the highest standards due to the potential impact that a failure could cause.

- Remove concrete culvert until all corrosion is exposed
- Class 3 garnet sand blasts for Novawrap keying factor
- Apply Novawrap pipeline system
- Pin Concrete culvert to its original state
- Novafast Novawrap was applied to the corroding pipeline
