

Client / Contractor:

Hope Valley Transfer Main SA Water

Job category: Maintenance

Scope of work:

This case study shows Novawrap being used externally to connect concrete and mild steel pipelines.

Project engineers needed to work out how to join the smaller outside diameter mild steel pipe to the larger outside diameter concrete pipes. Novafast were consulted to and Novawrap was used to externally join the pipes.

The Novawrap joints were designed stronger than the pipes being connected therefore ensuring a rigid connection between the two pipelines.

Novawrap was also specified to seal a failed attempt of joint concrete pipes with stainless steel clamps.

Services

- Site Maintenance
- Refurbishment Services
- FRP Engineering
- Concrete Treatments
- Protective Floor Coatings
- Water Proofing

Products

- Air Pollution Systems
- FRP Tanks & Pipe Systems
- FRP Scrubbers & Ducting
- Fibreglass Linings
